Most of our permanent associates are based in Sri Lanka as it offers a safe, mature and qualified business environment to base our operations.

The Sri Lankan legal system is based on the English common law. Our associates are graduates of the University of Colombo Law Faculty for both our paralegal associates and graduate lawyers. Admission to the faculty of law is extremely competitive.

Quality & Security Measures

As a lawyer, your most precious asset is your professional reputation. Our people, processes and IT systems are built to protect those standards. We retain full and effective supervision and control over every stage of work.

Confidentiality and Data Security

Our IT systems and buildings protocols are designed to protect sensitive information. All our personnel undergo a detailed security vetting process and must sign confidentiality agreements before commencing work.

Conflict Assessment

We undertake a thorough conflict check prior to engaging any client or work. Any potential conflicts are discussed with you prior to commencing work.

Competence

You will meet and interview the principal with carriage of your work prior to us commencing and ensure your team's qualifications and backgrounds. We offer a trial period within which time you can cancel your retainer with us without any obligation.

Supervision

We'll agree upon reporting and milestone dates, where work and progress updates will be given to you.

Your Client's Consent

We do not deal directly with your client; however, it is critical that your client is aware of our contribution to their work. We can assist with this if required.

Insurance

Most of the work we undertake will be covered by your existing professional insurance. Should you require specific advice on the impact of outsourcing on your professional indemnity insurance, we can assist in obtaining that advice.
